

EVRW Industry 2017

“Manufacturing Employees Vote”

This September 25-29, [ORGANIZATION] will be participating in Employee Voter Registration Week. The manufacturing industry is faced with many challenges from shifting labor regulations to ensuring infrastructure investment and supporting trade agreements that promote job creation. But it is time that we make our voices heard.

While your locality or state may or may not have elections this year, we need to make sure that we are prepared and ready to vote in the primary elections quickly approaching in 2018. In these mid-term elections, we will have the opportunity to vote for all Congressional seats along with one-third of the U.S. Senate and many statewide and local officials.

The political landscape is constantly changing, and in order for our voices to be heard and for our opinions to matter, we must register to vote and go to the polls for the primary and general elections coming up in 2018. Our jobs are demanding and it can be difficult to balance work, home and other activities in between. But registering and voting doesn't have to be difficult or take up much time. We make it easy for you by hosting a voter registration and election information center on our website [WEBSITE LINK]. Simply type in your [zip code/address] to find out when and how you need to register. Also, find out more information about voting early in your state if you don't think you can make it to the polls on Election Day.

By participating in Employee Voter Registration Week, our hope is that our industry and organization will be better represented at the polls on Election Day. Together [ORGANIZATION's] employees vote and we impact the outcomes of every election.
